RE: Annual Reports for 2014 and 2013 for Export of Hazardous Waste from
Former Union Carbide Niacet Site, 400 47th Street, Niagara Falls, NY
NYR000196618

Dear Sir or Madam,

Union Carbide Corporation is conducting a remedial response under a Voluntary Agreement with the New York Department of Environmental Conservation (NYDEC) on the property located at 400 47th Street, Niagara Falls, NY. The response is related to historical impacts from past operations and unrelated to current operation at the site now owned by Niacet Corporation.

As part of the remedy, Union Carbide has excavated contaminated soil characterized as D009. Union Carbide selected Stablex Canada Inc., 760 Industrial Boulevard, Blainville, Quebec for disposal of the soil since there were limited or no reasonable disposal option available to us regionally within the US. The hazardous waste exported is solely from this remediation project and not from current operations.

Union Carbide has submitted annual hazardous waste reports to the State of New York for these activities. This reporting may not have reached US EPA. As such, attached please find the Annual Reports for 2014 and 2013 required by 40 CFR 262.56 for the export of hazardous wastes generated by this project from this location.

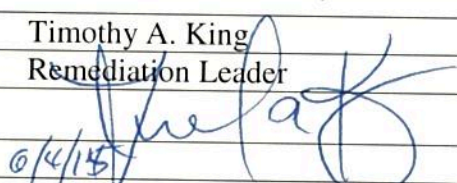

If you have any questions or need additional information, please contact me at the address above, by email at kingta@dow.com or by phone at 304-747-3763.

Sincerely,

Timothy A. King
Sr. EHS Remediation Manager

received
